Dad's Kitchen Update

Renovation by Kitchen Design Concepts, Carrollton

BY AMY MEADOWS

This North Dallas homeowner—a single dad with young sons—wanted a "hip" and functional kitchen where he could entertain friends, house state-of-the-art cooking tools for creating amazing meals and provide his children with a space where they would feel right at home. The experts at Kitchen Design Concepts took their cue from the homeowner himself, working hard to ensure that the kitchen reflected his unique personality. The result is at once contemporary and comfortable, with bold details like the daring use of color and stainless steel accents, including a steel-ball shimmer curtain that separates the kitchen from the adjacent circular breakfast room. The space also features updated appliances, a stainless-steel island, tall pullout pantry shelves, and a nearby wine cellar and humidor. Finally, a custom backsplash that artistically incorporates the boys' names adds a very personal touch.
